

Issue name 1: Docker daemon seems to be in a buggy state after restarting a container
Issue Link 1: <https://github.com/moby/moby/issues/43500>
Issue name 2: 172.x.x overlay network does not get added to /etc/hosts
Issue Link 2: <https://github.com/moby/moby/issues/43496>
Issue name 3: Job docker.service/start failed with result 'dependency'.
Issue Link 3: <https://github.com/moby/moby/issues/43493>
Issue name 4: Mount API to support creating host path if missing
Issue Link 4: <https://github.com/moby/moby/issues/43483>
Issue name 5: A container has been force exited but docker ps reports the container Up
Issue Link 5: <https://github.com/moby/moby/issues/43482>
Issue name 6: Can we support PKU in docker by default? (pkey_mprotect(2), pkey_alloc(2), pkey_free(2))
Issue Link 6: <https://github.com/moby/moby/issues/43481>
Issue name 7: udisks_mount_get_mount_path: assertion 'mount->type == UDISKS_MOUNT_TYPE_FILESYSTEM' failed
Issue Link 7: <https://github.com/moby/moby/issues/43478>
Issue name 8: Enabling IPv6 Immediately breaks some host's IPv6 networking (accept_ra=1)
Issue Link 8: <https://github.com/moby/moby/issues/43466>
Issue name 9: IDE doesn't recognize the moby repository as a Go project
Issue Link 9: <https://github.com/moby/moby/issues/43451>
Issue name 10: Unreachable else if case in docker_cli_build_test.go
Issue Link 10: <https://github.com/moby/moby/issues/43450>
Issue name 11: docker-containerd-shim can't recovery defunct children process on kernel 5.4.x
Issue Link 11: <https://github.com/moby/moby/issues/43447>
Issue name 12: Non-ICMP Traffic Timesout for Non-Local Docker Swarm Nodes
Issue Link 12: <https://github.com/moby/moby/issues/43443>
Issue name 13: Allow wildcard container host aliases
Issue Link 13: <https://github.com/moby/moby/issues/43442>
Issue name 14: Firewalld zones interface removal is not permanent
Issue Link 14: <https://github.com/moby/moby/issues/43440>
Issue name 15: windows container volume hcsshim::CreateComputeSystem access is denied
Issue Link 15: <https://github.com/moby/moby/issues/43436>
Issue name 16: internal network DNS lookup should not timeout with unknown hostnames
Issue Link 16: <https://github.com/moby/moby/issues/43430>
Issue name 17: Swarm: Same UDP and TCP host port not mapped
Issue Link 17: <https://github.com/moby/moby/issues/43429>
Issue name 18: docker failed to create endpoint kind1 on network kind
Issue Link 18: <https://github.com/moby/moby/issues/43425>
Issue name 19: Inconsistency when running same release of project on docker-in-docker and docker-from-docker vscode features.
Issue Link 19: <https://github.com/moby/moby/issues/43423>
Issue name 20: Download a big-dash-name docker image with download-frozen-image-

v2.sh

Issue Link 20: <https://github.com/moby/moby/issues/43421>

Issue name 21: PR #26618 inhibits access to /sys/firmware preventing common device detection in 64-bit kernels (aarch64)

Issue Link 21: <https://github.com/moby/moby/issues/43419>

Issue name 22: Hardlink optimization support for BuildKit

Issue Link 22: <https://github.com/moby/moby/issues/43415>

Issue name 23: COPY with tarball

Issue Link 23: <https://github.com/moby/moby/issues/43414>

Issue name 24: docker login succeed, but docker push return unauthorized: authentication required, tcpdump show http patch lose auth header

Issue Link 24: <https://github.com/moby/moby/issues/43412>

Issue name 25: Windows containers does not restart after Windows Server 2019 restart.

Issue Link 25: <https://github.com/moby/moby/issues/43408>
