

Issue name 1: Native support with cloud logging
Issue Link 1: <https://github.com/tqdm/tqdm/issues/1319>
Issue name 2: add configuration to turn off progress bars
Issue Link 2: <https://github.com/tqdm/tqdm/issues/1318>
Issue name 3: Issues with tqdm and multiple bars when running under tmux
Issue Link 3: <https://github.com/tqdm/tqdm/issues/1315>
Issue name 4: PyTorch Multiprocessing Bug
Issue Link 4: <https://github.com/tqdm/tqdm/issues/1312>
Issue name 5: tqdm in jupyter notebook renders like a JSON
Issue Link 5: <https://github.com/tqdm/tqdm/issues/1310>
Issue name 6: YOLOv5 tqdm progress bar multi-line output bug
Issue Link 6: <https://github.com/tqdm/tqdm/issues/1307>
Issue name 7: [tqdm.rich] latest rich breaks the example
Issue Link 7: <https://github.com/tqdm/tqdm/issues/1306>
Issue name 8: Random duplicated line on multithreaded progress bar update
Issue Link 8: <https://github.com/tqdm/tqdm/issues/1305>
Issue name 9: incompatible with python docker sdk
Issue Link 9: <https://github.com/tqdm/tqdm/issues/1304>
Issue name 10: TypeError raised if not calling close on object created with
dynamic_ncols=True
Issue Link 10: <https://github.com/tqdm/tqdm/issues/1303>
Issue name 11: AttributeError: 'tqdm' object has no attribute 'disable'
Issue Link 11: <https://github.com/tqdm/tqdm/issues/1300>
Issue name 12: Issue with hex colour in VS Code terminal
Issue Link 12: <https://github.com/tqdm/tqdm/issues/1298>
Issue name 13: Add optional postfix_separator parameter for custom postfix strings
Issue Link 13: <https://github.com/tqdm/tqdm/issues/1297>
Issue name 14: using 8 GPUs in training loop printed a lot of messages while only
rank==0 have tqdm bar
Issue Link 14: <https://github.com/tqdm/tqdm/issues/1294>
Issue name 15: pytest-asyncio DeprecationWarning regarding migration of
asyncio_mode default value
Issue Link 15: <https://github.com/tqdm/tqdm/issues/1289>
Issue name 16: AttributeError: 'list' object has no attribute '_comparable'
Issue Link 16: <https://github.com/tqdm/tqdm/issues/1288>
Issue name 17: Add return_exceptions to asyncio.gather wrapper
Issue Link 17: <https://github.com/tqdm/tqdm/issues/1286>
Issue name 18: ipywidgets variant broken
Issue Link 18: <https://github.com/tqdm/tqdm/issues/1283>
Issue name 19: [Feature Request] get reference a tqdm instance inside a loop
Issue Link 19: <https://github.com/tqdm/tqdm/issues/1279>
Issue name 20: Cleanup with colour on jupyter notebook doesn't work
Issue Link 20: <https://github.com/tqdm/tqdm/issues/1277>
Issue name 21: logging_redirect_tqdm not respecting log level of original stream handler
Issue Link 21: <https://github.com/tqdm/tqdm/issues/1272>
Issue name 22: Unexpected behaviour when instantiating outside of the loop

Issue Link 22: <https://github.com/tqdm/tqdm/issues/1271>

Issue name 23: Cannot append elements to shell array while using tqdm

Issue Link 23: <https://github.com/tqdm/tqdm/issues/1270>

Issue name 24: rich based progress part doesn't 'complete' cleanly

Issue Link 24: <https://github.com/tqdm/tqdm/issues/1266>

Issue name 25: Update using current "total" (and not increment size)

Issue Link 25: <https://github.com/tqdm/tqdm/issues/1264>
