Issue name 1: Improve the HPA observability by add a calculated replicas in metric status of each metric
Issue Link 1: https://github.com/kubernetes/kubernetes/issues/109538
Issue name 2: liveness probe doesn't work
Issue Link 2: https://github.com/kubernetes/kubernetes/issues/109537
Issue name 3: Too many Kubernetes Aggregated Flakes from gcepd and windows-gcepd storage drivers
Issue Link 3: https://github.com/kubernetes/kubernetes/issues/109535
Issue name 4: Pods are in Running, Terminating state even after the expiry of shutdownGracePeriod during Graceful Node Shutdown
Issue Link 4: https://github.com/kubernetes/kubernetes/issues/109531
Issue name 5: How to Add HSTS HTTP Header to Kubelet Agent
Issue Link 5: https://github.com/kubernetes/kubernetes/issues/109530
Issue name 6: Perma failing Jobs in test-grid
Issue Link 6: https://github.com/kubernetes/kubernetes/issues/109521
Issue name 7: [Failing test] capz-windows-containerd-master
Issue Link 7: https://github.com/kubernetes/kubernetes/issues/109515
Issue name 8: The test case failed to call the exec container because the container exited automatically
Issue Link 8: https://github.com/kubernetes/kubernetes/issues/109500
Issue name 9: Validation of ContainerPorts
Issue Link 9: https://github.com/kubernetes/kubernetes/issues/109498
Issue name 10: can we concurrently get metrics in hpa-controller?
Issue Link 10: https://github.com/kubernetes/kubernetes/issues/109496
Issue name 11: kubectl wait with jsonpath fails when field is not found
Issue Link 11: https://github.com/kubernetes/kubernetes/issues/109489
Issue name 12: Job tracking might leave pods with finalizers when backoff limit is reached
Issue Link 12: https://github.com/kubernetes/kubernetes/issues/109485
Issue name 13: kubectl describe pod is missing env var values populated by downward API (spec.nodeName, status.podIP)
Issue Link 13: https://github.com/kubernetes/kubernetes/issues/109482
Issue name 14: Need benchmarks for iptables proxy golang performance hacks
Issue Link 14: https://github.com/kubernetes/kubernetes/issues/109481
Issue name 15: scheduler volumebinding: consider leveraging PreFilterResult to shift node affinity check to PreFilter
Issue Link 15: https://github.com/kubernetes/kubernetes/issues/109475
Issue name 16: kubectl cp 8g.tar <some-namespace>/<some-pod>:/tmp/bar
Issue Link 16: https://github.com/kubernetes/kubernetes/issues/109474
Issue name 17: Add cgroup v2 support for In-place Pod Vertical Scaling feature
Issue Link 17: https://github.com/kubernetes/kubernetes/issues/109469
Issue name 18: API docs generation for "non exhaustive enums" disappeared
Issue Link 18: https://github.com/kubernetes/kubernetes/issues/109463
Issue name 19: The validation of Annotations
Issue Link 19: https://github.com/kubernetes/kubernetes/issues/109459
Issue name 20: implement the Object interface of k8s.io/apimachinery/pkg/apis/meta/v1

Issue Link 20: https://github.com/kubernetes/kubernetes/issues/109457
Issue name 21: Inconsistent POD status reporting with kubectl get && describe
Issue Link 21: https://github.com/kubernetes/kubernetes/issues/109451
Issue name 22: Pods are getting Scheduled and in Pending state during Graceful Node Shutdown.
Issue Link 22: https://github.com/kubernetes/kubernetes/issues/109450
Issue name 23: HPA doesn't attempt to add more pods even if pod provisioning fails
Issue Link 23: https://github.com/kubernetes/kubernetes/issues/109445
Issue name 24: capz-windows-containerd-master occasionally hangs during workload cluster creation
Issue Link 24: https://github.com/kubernetes/kubernetes/issues/109444
Issue name 25: Kube proxy kernelspace for windows should build its own HNSEndpoint
Issue Link 25: https://github.com/kubernetes/kubernetes/issues/109438
